TECHNOLOGIES
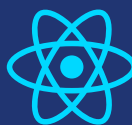

WORK EXPERIENCE

Software Developer
Flux IT | Jan 2021 - Present

- API development with Django Rest Framework to integrate 3rd party systems with internal company applications.
- Documentation with Swagger.
- Redis for caching.
- Gitlab CI/CD with Docker, k8s.
- Frontend development with React/Typescript.

Django Developer
Freelance | March 2020 - September 2020

I helped with new features design and bug fixes for HCD/Recupero, a clinic history management system made with Django.

I worked both in the frontend and the backend, defining and updating Django models, views, forms and templates of the system. Also made tests for every functionality added or modified. Link to project

EDUCATION

Computer Systems Analyst
Instituto Superior 25 de Mayo | 2015 - 2020

ABOUT ME

Interests

- Functional Programming
- Infrastructure as Code
- Documentation
- All things testing
- Apps Architecture Patterns
- Observability
- DevOps

On my free time I like to contribute to projects I use or consider interesting. For example:
- Python Argentina (Forum, Website)
- Translation of Python docs to Spanish
- Django forum
